# About Us

Founded in 2010, FreeJack is 100% privately owned company. With the will to provide customized technology solutions and good local support for residential and commercial spaces, we were very soon recognized and appreciated as preferred partner for audio, video and Smart Home solutions. Among many other projects we successfully finished, from Boka Bay to Manhattan-New York, we are proud to say that we are a company of choice for installation and maintenance of all installed smart home systems in Porto Montenegro residences.

# Our Path

We started our business with installing specialized audio systems. Logically, we soon expanded to other audio-visual systems, which today make almost half of our business. In 2012 we sign with Control4, as authorized dealer for Montenegro, and since then we started to provide all areas in the smart home eco-system. In 2016, we have opened our “Smart Store” in Tivat, the first fully smart showroom and retail in the Balkans, that included full voice control with A.I. The idea of the store is to be hands-on research zone for us and our potential clients, who are provided with the chance to try and feel the various solutions, before they make the decision to purchase.

# Today

Today, with our great experience and foundation in audio video technologies, we are focused on pushing the boundaries even further, by perfecting and providing true and full smart home solutions, that no other company in Montenegro offers (and as far as we know even in Balkans), which in its core includes full integration and adoption of (audio-video) multimedia systems, A.I. voice control, smart device and on TV-screen control GUI, advanced "colored" lighting integration, together with all other "usual" automation solutions like dimmable lighting, temperature, shades and other...

# Mission

We are committed to delivering the most innovative effective residential and commercial lifestyle technology solutions with world class products and service.

# Vision

We aim to influence development of connected lifestyle technology systems, improve lifestyle, entertainment, security, comfort & convenience and energy efficiency, to benefit the society.

*Reliability and Flexibility are our main features, which we are committed to preserve in the future.*

*"Freejack D00 offers a range of lifestyle services, to simplify the way you interact with technologies, through entertainment, lighting, comfort and security."*

***Jovan Pericic - Owner | Founder***

With Control4 as our strategic partner willing to stand by us and our work on bigger projects, we are proud to boldly claim that there is no Smart Home project in Montenegro that we cannot meet. (more details and brochure on demand)

# Projects

From 2010, FREEJACK has worked on countless projects. We have relied solely on recommendation from our customer base, while at the same time respecting and protecting the privacy of our dear clients - most of them now even good friends.
